DETAILED ACTION

This Application has been examined. The claims 1, 5-21 are pending. The examination results are as following.

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method of driving an LCD comprising an array of pixels; cholesteric liquid crystal arranged between spaced transparent substrates; and a reset pulse and a plurality of selection pulses, the reset pulse selected from a group consisting of a pipeline and non-pipeline arrangement. The combination of the closest prior art, Masazumi (US 6,414,669), Kim et al. (6,373,457), Schlangen et al. (US 6,731,261) and Huang et al. (US 6,819,310) show a similar system, however, they fail to teach that wherein the selection pulses comprising amplitude modulated selection pulses of variable amplitudes of determined pulse width to provide multiplex addressing resultant driving waveform(s) as claims 1 and 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
